

# EL DORADO HILLS Economic Index™

The El Dorado Hills Economic Index™ measures the performance of our local economy based on 5 main components, all of which are equally weighted and seasonally adjusted. We use 2008 as our base year, starting with a value of 100.

With four of five components increasing, our Q3 15 Index is up 5% from the previous quarter. This puts our Index 68.5% beyond a full recovery when compared back to our pre-recession numbers of 2008. According to our latest El Dorado Hills Business Confidence Survey™ from January 2016, 52% of local business leaders expect a better local economy in the next 12 months, while just 8% expect worse conditions.

Click on the “read more” links below, or go to [www.eldoradohillschamber.com](http://www.eldoradohillschamber.com) to learn more about each Index component and to see the results of the newest El Dorado Hills Business Confidence Survey™!
